thoughts in circle:

Deterrence: when looked
at simply in binary/
2-person - dual terms, it
looks compelling. (see
Prisoner's Dilemma, limited
set of options/alternatives:
but consider moral - give
temptation to betray - to
search, postpone, invent
new options, redefine
values, accept self-
sacrifice (!) rather than
murder, betray, harm
ally/friend & signal/negot

But a state - and
individuals in it and
without - is/are best
limited to a few, "given"
alternatives; and policy is
multi- (multi-) dimensional:

a deterrent Cap. as a
pre^{con}vention looks compelling

US vs. Hitler, SU vs. US,

China vs. US + SU

despite the fact that

1) it risks a new arms race,
and can, in a crisis,

increase risks of war,

2) it is a threat (or risk)

of an "absolutely evil"

act - one that "cannot" be

considered a "necessary,

lesser" evil (Ogawa)

no adequate alternative, to

preventing total domination or

[a Way to Power]

One truth is that
although we share
the goal of abolition,
no one really knows
how to achieve it.

It simply will take
a great change in the
int. order of sov.
states and for war

[END/BAN WAR]

before present NWS will
give up every one of the
weapons - and that will
be difficult and take very
long.

Does that mean the
goal should be
ignored, abandoned
as Utopian, naive,
unrealistic? Not at

all. I believe that
the ones who are naive + Utopian
~~are~~ ^{are} those — like the

leaders of all the NWS —
who believe that
peace, war, cities and
human life can coexist
indefinitely.

So we must ~~try~~
learn how to eliminate

years

(and ~~change~~ into
order & law war)
and we must start
now - there is no time
to lose.

Meanwhile, do we
know what ^{else} to do
next - how to reduce
our danger & weapons
drastically, to
non-abolition?

Yes - you know.

The program of
Denuclearization, which
has broad support
worldwide [NPT conf]
and in the US,
outside the governments
of the NWS & their allies.

1. CTB...
2. NFEU (conf China...)
after reform)
3. Out of Cuts (to ~~be~~ ^{be} ~~done~~ ^{done} ~~or~~ ^{or} ~~then~~ ^{then})
4. End prod. of all fiss.
mat
5. Transparency ^{quickly}
^{could be done}
6. Deactivation —

This means the "non-alcohol"
+ drastically reduce danger.

So we know what to
do. The problem
is not one of
NWS ~~disasters~~ is
committed committed
to or even wants
any one of the above
elements of this approp.
+ urgent program.

If there are any
exceptions to this:

- USG willing to end
PO (if that's Open, now)

- China's approp. declaratory
policy (but, this actions...)

otherwise, to all oppose
all of these measures.

- no intention for deep
cuts.

- no commitment to
full, time Comp. TB.

- ~~no~~ NFO, etc.

and ~~to~~ ~~the~~ WS gives higher
priority to ~~any~~ of
